

# Build Your Confidence in Paediatric Disability Management - Online Module Overview

This module follows on, and extends the learning, from the **Build your confidence in disability management** course.

This course is designed to upskill physiotherapists to increase their confidence in working with children with a disability. It would be a valuable starting point for physiotherapists who may be interested in undertaking further learning in paediatric and/or disability physiotherapy. The module may also be relevant to a range of allied health professionals.

There are a total of six self-paced topics which can be completed anywhere, any time with an internet connection. The course contains a mix of recorded lectures, references and resources.

## Intended learning outcomes

At the end of this module, participants should be able to:

- Identify key frameworks, guidelines and developmental considerations when working with a paediatric population
- Identify appropriate assessment and intervention approaches when working with children with a disability
- Describe scenarios when it might be applicable to refer paediatric clients with a disability
- Locate further information, resources and CPD to continue learning in this practice area

## Topics

1. Early Childhood Intervention - Guidelines, Pathways and Practice Standards  
*Denise Luscombe, APA Paediatric Physiotherapist, APAM, MACP*
2. Assessments in paediatrics  
*Greg Evans, APAM*
3. Activity and Participation goals and intervention approach within the International Classification of Function (ICF)  
*Dr Sarah Reedman, PhD, APAM*
4. Sensory Motor Development  
*Dr Kristy Nicola, PhD, APAM*
5. Early childhood interventions – physiotherapy  
*Dr Lynn Jensen, PhD, APAM*
6. Working with autistic children  
*Lisa Truscott, APAM*

This project was funded under the *Jobs and Market Fund* administered by the Department of Social Services
